

# Inquiry form

1. Which materials are subject to be bonded?  
.....
2. Additional information concerning the material (e. g. surface condition, form, contamination, depth of roughness, humidity content etc.):  
.....  
.....
3. Size of adherent surface:  
.....
4. Description of the subsequent utilisation:  
.....
5. Operational demands towards the connection: Type of strains, e. g. temperature, interior or exterior application etc.  
.....  

Chemicals or other media, e. g. cooling agents:  
.....

Mechanical strains, e. g. vibration, impact, displacement, tensile load, shear stress or pressure etc.:  
.....
6. May a solvent-containing product be applied?  
 Yes  
 No
7. After which time has the final strength to be reached?  
.....
8. Series launch or discontinuous?  
.....
