No information available.

This product contains respirable quartz. In the present physical form (liquid/pasty) and during the processing of the product, no dust is generated, so inhalation is not to be expected. Classification and labeling with STOT RE 1 / H372 is therefore not necessary. Depending on handling and use (e.g. grinding), the formation of airborne respirable crystalline silica is possible. Prolonged and/or intensive inhalation of respirable crystalline silicon dioxide can cause dust lung disease (silicosis).
